Before you Start

MEASUREMENTS

Measurements are given in both metric and imperial. You can work in whichever you prefer as long as you follow the same system throughout the pattern. Before you start check the measurements given for each garment and adjust them as necessary. The jumpers are designed to fit loosely, as can be seen if you compare the 'to fit' measurements with the 'actual measurements'.

TENSION

Each pattern gives the number of stitches and rows to a 10-cm (4-in) square on the recommended needle size. Check your tension on a test square before you start, for if it is incorrect the garment will not turn out the right size. If you have fewer stitches than the given tension, use needles a size smaller than those recommended in the pattern. If you have more stitches than the given tension then use needles a size larger.

ABBREVIATIONS

Each pattern has a list of abbreviations. Check them through before you start to make sure you understand them all.

CASTING ON

There are a number of ways of casting on but the easiest is the two-needle method. Make a slip loop with the yarn and place it on the left-hand needle. Insert the right-hand needle into it, wind the yarn round the right-hand

needle, draw a loop through and slip this loop onto the left-hand needle. Continue in this way until you have the required number of stitches on the left-hand needle, working into the last stitch on the left-hand needle each time.

CASTING OFF

Knit the first two stitches of the row. With the point of the left-hand needle lift the stitch furthest to the right on the right-hand needle over the nearer stitch, leaving one stitch on the right-hand needle. Knit another stitch, making two stitches on the right-hand needle. Lift the stitch furthest to the right over the nearer stitch as before. Continue in this way until only one stitch of the row remains. Cut the yarn and pass the end through this stitch to fasten off.

STOCKING STITCH

Stocking stitch is formed by alternate rows of knitting and purling.

KNITTING

Hold the needle with the cast-on stitches in the left hand. Insert the right-hand needle into the first stitch on the left-hand needle, from the front of the stitch to the back and from right to left. Wind the yarn round the point of the right-hand needle and draw a loop through the stitch on the left-hand needle, keeping the new loop on the right-hand needle and allowing the old stitch to slip off the left-hand needle. Continue in this way until no stitches remain on the left-hand needle, then transfer the right-hand needle to the left hand and start the next row.

PURLING

Hold the needle with the cast-on stitches in the left hand. Insert the right-hand needle into the first stitch on the left-hand needle, from the back of the stitch to the front, and from right to left. Wind the yarn round the point of the right-hand needle and draw a loop through the stitch on the left-hand needle, keeping the new loop on the right-hand needle and allowing the old stitch to slip off the left-hand needle. Continue in this way until no stitches remain on the left-hand needle, then transfer the right-hand needle to the left hand and start the next row.

JOINING IN YARN

If possible join in a new ball of yarn of the same colour at the beginning of a row. Any long ends that are left can be used for sewing up.

PRESSING

Follow the instructions given with the yarn. Do not press the ribbing. Each piece of the garment should be pressed separately to the measurements given in the pattern. Place each piece on the ironing board with the wrong side uppermost and use a damp (or dry, or wet, according to the yarn instructions) cloth. Press by raising and lowering the iron, do not move it about as in ordinary ironing.

SEWING UP

Invisible seams should be used for the side and sleeve seams, where the seam runs in the direction of the knitting. *Back-stitched seams* should be used where the seam runs across the direction of the knitting, as in the shoulder seams.

Invisible seaming

With right sides facing you place the two edges to be joined close together. Secure the yarn at one end and bring the needle and yarn through to the right side of the garment at one end of the seam. Take the needle across and insert it under the thread that connects the first and second stitch of each row. Draw the needle and yarn through and then insert them through the same

thread of the other piece of knitting. Continue weaving across the two pieces, drawing them together firmly but not too tightly.

Back-stitch seaming

Hold the two pieces to be joined right sides together, with the edges aligned. Secure the yarn at one end and then back-stitch from right to left, moving one stitch to the right, or backwards, on the side facing you and two stitches to the left, or forwards, on the side away from you.

ALTERNATIVE YARNS

Some patterns in the book recommend a particular type of yarn. If this cannot be obtained it is usually possible to use a different yarn of the same weight, providing you can produce the right tension with it.

WORKING FROM PLACE CHARTS

When working from the charts, use a separate ball of yarn for each colour area worked. Twist yarns together on the wrong side at joins when changing colours to avoid a hole, and where

necessary strand yarn not in use loosely across the wrong side of the work over not more than three stitches at a time to keep the fabric elastic.

When reading the charts, work knit rows (odd-numbered rows) from right to left, and purl rows (even-numbered rows) from left to right.

AMERICAN TERMINOLOGY

Most knitting terms are identical in English and American usage. The exceptions to this are listed below, with the English term used in the book given first.

stocking stitch (st. st.) = stockinette stitch

yarn round needle (y. o. n.) = yarn over needle (y. o. n.)

cast off = bind off

tension = gauge

swiss-darning = duplicate stitch

You've heard of the book of the film. Well, this is something much more unusual. It's the sweater-of-the-book! And, naturally enough, it's modelled by the book's brilliant and beautiful author, Linda O'Brien. As you know, our book's called *Knitability*, but you can call yours anything you like. How about *The Embarrassing Moment* by Lucy Lastick? ... On second thoughts, perhaps not.

Peacock Plumage

When it comes to the birds let's face it: the peacock's a lot lovelier than the peahen. When it comes to the Brandreths, the reverse is true - and the proof is this picture of my matchless wife. I call her a bird of paradise in human form. She calls herself Michèle Brown.

Pond Life

I first met the young Welsh boy soprano Aled Jones when he starred as Christopher Robin in a play I wrote with Julian Slade about the life and times of A.A. Milne. When I met him I knew he could sing like an angel. Soon I discovered he could act like Olivier as well.
